</> PROFESSIONAL SUMMARY

Frontend Engineer with over **4 years of experience** building scalable, high-performance web applications using **React.js, Next.js, TypeScript, and modern frontend tooling**. Experienced in developing fintech platforms, internal dashboards, and customer onboarding systems that support real-world business operations. Skilled at translating UI/UX designs into responsive, production-ready interfaces with a strong focus on performance optimization, accessibility, and user experience.

Passionate about building maintainable frontend architecture and delivering intuitive digital experiences.

📁 PROFESSIONAL EXPERIENCE

07/2025 – Present
Lagos, Nigeria

Sapphire Virtual Network Limited 📄

Frontend Engineer

- Owned frontend development of a **Recovery Portal** used by field collections agents to manage visitations, submit structured field reports, and track recovery operations.
- Collaborated with cross-functional teams to develop **role-based dashboards** and **secure internal interfaces** for the company's **3.0 unified platform**, improving operational visibility across multiple business units.
- Developed agent-facing workflows for the **Device Financing module**, including customer onboarding, KYC verification, and device purchase processing.
- Improved workflow efficiency and user experience by redesigning critical user flows from the legacy Version 2.0 platform.

Ontario, Canada

ShotByPortable 📄

Frontend Engineer

- Built a responsive photography portfolio platform using modern frontend technologies.
- Translated UI designs into a seamless user experience optimized for both desktop and mobile devices.
- Developed a **custom admin dashboard** allowing the client to manage galleries, pricing packages, and bookings.
- Improved navigation, usability, and brand presentation across the entire website.

Ibadan, Nigeria

Siryong Technologies 📄

Frontend Developer

- Developed and deployed the company's platform using **Next.js, TypeScript, and Tailwind CSS**.
- Translated Figma UI designs into pixel-perfect, reusable UI components.
- Implemented **SEO optimization and Open Graph metadata** to improve social sharing previews and search visibility.
- Optimized performance and responsiveness to ensure fast loading times across devices.

Alberta, Canada

AyoCPA 📄

Frontend Developer

- Developed a professional website for a Canadian accounting firm to strengthen its online presence.
- Collaborated with UX designers to translate UI concepts into functional frontend components.

- Built a **Client Portal interface** allowing users to access tax filing services and financial resources online.
- Ensured consistent design and usability across multiple screen sizes.
